> I worked closely with Kyle during his first few months at Paycom. He was very eager to learn and picked up new skills and techniques quite quickly. It wasn't long before he moved on to be a real leader on his team and proved to be a real asset to the company. I enjoyed my time working with Kyle and would definitely work with him again.

> **— Travis Frels**

Kyle is a developer of rare skill and is eager to learn new things. I had the pleasure of working with him and watching him learn new skills and techniques rapidly, while also growing in his appreciation for a disciplined approach to software development. Kyle is a quick study and dives passionately into complex technical topics with great results. I firmly believe that any technical problem that comes his way will be overcome quickly with good engineering practices to boot.

— Phillip Martin
